

MANI SANDELA

Data Analyst | Business Intelligence | Power BI | Tableau | SQL | Python

2487305508 | manisharan0902@gmail.com

PROFESSIONAL SUMMARY

Data Analyst with 5+ years of experience transforming complex business and operational data into reliable reporting, dashboards, analytical datasets, and actionable insights. Strong expertise in SQL, Power BI, Tableau, Python, advanced Excel, data modeling, ETL/ELT, data quality, reconciliation, KPI reporting, requirements gathering, UAT, and root-cause analysis. Experienced partnering with business and technical stakeholders to define requirements, automate reporting, troubleshoot data issues, improve processes, and deliver governed analytics solutions for decision-making.

TECHNICAL SKILLS

Data Analysis & BI: Power BI, Tableau, Excel, Data Visualization, Dashboard Development, KPI Reporting, Ad Hoc Analysis, Trend Analysis, Variance Analysis, Descriptive Statistics

Power BI: DAX, Power Query, Data Modeling, Semantic Models, KPI Dashboards, Report Development, Data Validation, Business Logic

SQL & Databases: SQL, T-SQL, SQL Server, Oracle, PostgreSQL, MySQL, Snowflake, Complex Queries, Joins, CTEs, Window Functions, Stored Procedures, Query Optimization

Data Engineering: ETL/ELT, Data Pipelines, Data Warehousing, Dimensional Modeling, Schema Design, Data Transformation, Source-to-Target Mapping, Databricks, PySpark, Spark SQL

Programming: Python, Pandas, NumPy, SQL Automation, Data Wrangling

Quality & Governance: Data Validation, Reconciliation, Data Profiling, Duplicate Detection, Data Integrity, Data Governance, Audit Controls, Role-Based Access, User Permissions

Business Analysis: Requirements Gathering, Business Requirements, Process Analysis, Stakeholder Management, UAT, Root Cause Analysis, Process Improvement, Technical Documentation, JIRA, Agile

Enterprise & Cloud: Salesforce, SAP, AWS, Microsoft 365, Windows

PROFESSIONAL EXPERIENCE

Capital One | Data Analyst | Sep 2025 - Present

- Develop and maintain analytical datasets, data models, pipelines, dashboards, and recurring/ad hoc reporting solutions supporting business and operational decision-making.
- Write and optimize complex SQL/T-SQL queries and reusable transformations across relational data sources, applying joins, CTEs, aggregations, and business rules.
- Design Power BI datasets and dashboards with DAX measures, Power Query transformations, defined KPIs, validation controls, and documented metric definitions.
- Analyze trends, variances, exceptions, and performance drivers and translate findings into clear recommendations for business stakeholders.
- Build automated data pipelines and quality controls that validate completeness, reconcile source-to-target data, and create traceable reporting outputs.
- Troubleshoot reporting, query, data-flow, access, and downstream dependency issues; perform root-cause analysis and coordinate resolution with technical teams.
- Partner with stakeholders to gather requirements, document business rules and data definitions, prioritize requests, support UAT, and communicate project progress.
- Support governed access to reporting data and collaborate on security, permissions, testing, documentation, and production deployments.

Lawrence Technological University | Library Student Assistant (Part-Time) | May 2024 - Dec 2025 | Michigan

- Collected, maintained, validated, and analyzed institutional operational data using Excel to support daily operations and information requests.
- Prepared accurate records and documentation while maintaining data confidentiality, organization, and consistency.
- Provided customer and technology support to students and staff, troubleshooting access and system issues and coordinating escalation when needed.
- Managed multiple priorities in a service-oriented environment requiring communication, attention to detail, and dependable follow-through.

Tata Consultancy Services | Data Analyst | Dec 2019 - Feb 2023

- Developed enterprise Power BI and Tableau dashboards, analytical datasets, recurring reports, and KPI scorecards using relational enterprise data.
- Created complex SQL/T-SQL queries and stored procedures for extraction, transformation, validation, reconciliation, and reporting across SQL Server and Oracle environments.
- Built ETL/ELT and reporting workflows and supported relational data models, data mappings, and analytics-ready datasets for downstream business use.
- Performed trend, variance, exception, and ad hoc analysis to identify business drivers and communicate actionable insights to stakeholders.
- Partnered with stakeholders to gather requirements, document business rules and data definitions, and translate reporting needs into technical specifications.
- Performed data profiling, reconciliation, duplicate detection, and validation, improving reporting accuracy by 25%.
- Automated recurring reporting and data-preparation workflows using SQL and Python, reducing manual effort by 40%.
- Troubleshot reporting queries and data-flow issues, performed root-cause analysis, supported UAT, and coordinated fixes with technical teams.
- Prepared technical documentation, SOPs, testing evidence, data definitions, and end-user guidance for reporting and analytical solutions.

PROJECTS

- **Enterprise BI & KPI Reporting:** Developed Power BI dashboards, Tableau visualizations, reusable DAX measures, analytical datasets, and KPI reporting for operational decision support.
- **SQL & Data Modeling:** Built complex SQL/T-SQL queries, stored procedures, relational reporting structures, validation logic, and source-to-target mappings.
- **Reporting Automation & Data Quality:** Automated data preparation and reporting workflows with SQL/Python and implemented reconciliation, profiling, and audit checks.
- **Business Analysis & UAT:** Gathered reporting requirements, documented business rules and acceptance criteria, supported UAT, investigated defects, and coordinated resolution.

EDUCATION

Lawrence Technological University, Michigan | Master of Science, Information Technology | Specialization: Business Data Analytics | GPA: 3.8/4.0 | Aug 2023 - Dec 2025

CERTIFICATION

Databricks Certified Data Engineer Associate
